

Chapter 4

METALS & NON-METALS

QUESTIONS & ANSWERS:

Q1. Which gas is formed when iron metal reacts with dilute acids?

Ans. Hydrogen

Q2. Complete the following reaction

Iron + Copper Sulphate $\longrightarrow$?

Ans. Iron Sulphate + Copper

Q3. The gas formed when aluminium metal reacts with dilute acid (or) base is _____

Ans. Hydrogen

Q4. Least reactive metal in activity series of metals is _____

Ans. Platinum
