

Chapter 15

IMPROVEMENT IN FOOD RESOURCES

Green Revolution:

- M.S. Swaminathan was the father of green revolution in india.
- He introduced the usage of fertilizers, high quality seeds and modern technology for better agricultural output.

White Revolution:

- V. Kurein, the father of white revolution in India.
- It is associated with sharp increase in the milk production in the country.

Blue Revolution:

- Hiralal chaudhuri the father of blue revolution in India.
- It is associated with remarkable increase in the production of fish and marine products.

However, by doing these revolution food production got increased but natural resources are getting destroyed which leads to loss in environmental balance. Hence, there is a need for sustainable practices in agriculture and animal husbandry.
